

BluVue HD

Resin-Based Impression Mix

ROAD TESTED!

LANCER
ORTHODONTICS

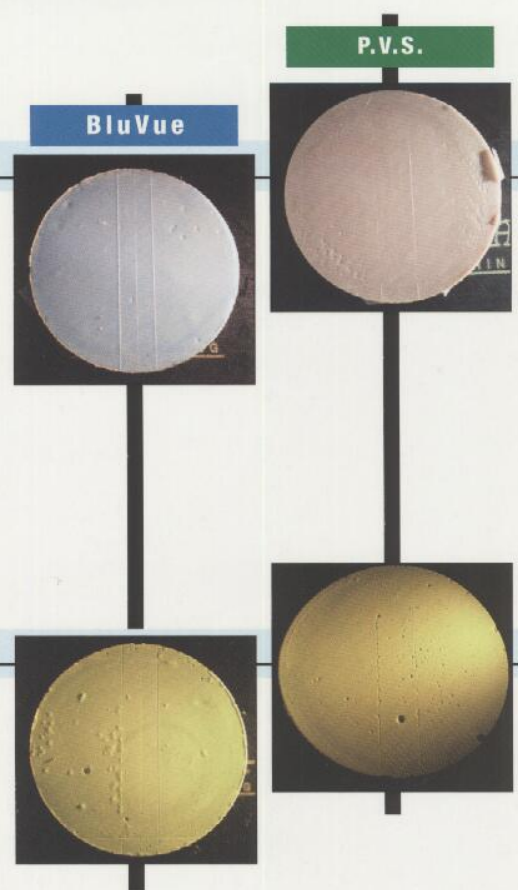

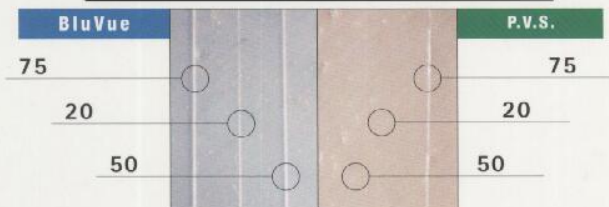

Proven Results in Extensive Testing...

BluVue vs P.V.S.

Accuracy Test Protocol

1. Takes impression of 20, 50 and 75 micron scribe and replicates the scribe on gypsum stone.
2. Lines should be consistent and visible across the diameter.

SCRIBE LINE COMPARISON

Gypsum Compatibility

1. ISO requires that all lines get replicated on gypsum stone.
2. P.V.S. Tested – Kerr and Dentsply.

Features and Benefits...

- High Definition Extremely Accurate Impression Material
- Once Cured, Resistant to Deformation and Tearing
- Simple to Mix, Easy to Use, with No Clean-up
